What is E-safety?

E-safety is a term which means not only the internet but other ways in which young people communicate using electronic media, e.g. mobile phones. It means ensuring that children and young people are **protected from harm and supported to achieve the maximum benefit from new and developing technologies without risk to themselves or others.**

How you can help your child stay safe?

The best way to help your child to be a safe when using the internet and new technologies is to talk to them and make sure they understand **these simple rules:**

- You **should never give out personal details** to online 'friends'. Use a nickname when logging on and don't share full name, email address, mobile number, school name and any photos, including photos of family or friends - any picture or video online can be changed or shared without permission.
- **Talk to your child about what they are doing online** and who they are talking to. Get them to show you how to use things you are not familiar with. **Keeping the computer in a family room** means that you can share your child's online experience, they are less likely to act inappropriately (i.e. via webcam) and their online 'friends' will see they are in a family room..
- If your child receives a message that upsets them, **remind them not to reply**, they should save the message and show you or another trusted adult.
- **Spam and junk emails and texts are not true**, don't reply or send them to anyone else, just delete them.
- **Don't open files sent from people you don't know**. They could contain a virus, or worse - an inappropriate image or film.
- **An online 'friend' is anyone you have not met in real life**; no matter how long you have been friends with them.

- Help your child to understand that **some people lie online** and that it's better to keep online 'mates' online. They should never meet up with any online 'friends' without an adult they trust.
- Make sure they **know how to block someone online** and report them if they feel uncomfortable.
- Make sure your child feels able to talk to you, let them know that it's never too late to **tell someone if something makes them feel uncomfortable**.

At Crabtree we teach the children to be **E Safe**. We have displays in classrooms and common areas of the school that remind the children of the E safety message. The subject leaders keep abreast of what is new and ensures that colleagues are informed of relevant changes. Fortnightly, in newsletters we pose an E safety thought which makes us stop and think and reminds us to be vigilant with this exceptionally important issue.

In lessons, when we are using the internet, we regularly remind them of being safe and what to do if they see something that makes them feel uncomfortable.

We have half termly E safety assemblies as a whole school and teach the children different ways of staying safe. In computing we always draw the pupil's attention to our **SMART** mnemonic.
